

The Recovery of Unconscious Memories: Hypermnesia and Reminiscence, ISSN 1071-104X. University of Chicago Press, 1996. 9780226216607. 1996. 243 pages. Matthew Hugh Erdelyi

Memory has recently become the focus of media attention because of the emotionally charged uses made of delayed recall of repressed memories. Integrating literatures from all corners of psychology, *The Recovery of Unconscious Memories* includes historical accounts, analysis of experiments, and treatment topics, providing the first comprehensive scientific account of memory and how can it can increase over time. Erdelyi includes his own important contributions to this field, ranging from his early attempts to use free-association to produce hypermnesia to his most recent research with hypnosis, ...
Integrating literatures from all areas of psychology, this text includes historical accounts, analysis of experiments, and treatment of topics from free-association and hypnosis to truth sera, to provide a comprehensive scientific account of memory increasing over time.
