Celtic tribes called the Piets penetrated into the mountains on the North; some Piets as well as tribes of Scots crossed over to Ireland and settled there. Later the Scots returned to the larger island and settled in the North beside the Piets. The Celts are a collection of Indo-European peoples in parts of Europe and Anatolia identified by their use of the Celtic languages and other cultural similarities. The history of pre-Celtic Europe and the exact relationship between ethnic, linguistic and cultural factors in the Celtic world remains uncertain and controversial. The exact geographic spread of the ancient Celts is disputed; in particular, the ways in which the Iron Age inhabitants of Great Britain and Ireland should be regarded as Celts. We have relied for so long on the Roman version of history, and, when a completely fresh version comes along, based on historical excavations, it is amazing how little fact has been told. I found this along with 'Barbarians', turned all my history upside down and sideways. For a small book it packed a very big punch.
