Slugs in Human Lives. Slugs get little respect from most people. They are usually thought of as slimy, very unappealing creatures and annoying garden and agricultural pests. A slug's mouth contains a structure called a radula, which is covered by rows of tiny and sharp teeth. The teeth are used for cutting and scraping or for grabbing hold of active prey like worms. There can be up to 27,000 teeth on the radula. Into every slug's life a little rain must fall they are not very fond of dry weather. Unlike snails, they have no mobile "home" to go into. They have been lucky lately, as after a pretty dry April and May, June and July have been very wet here in Wales. I have been watching! Into every slug's life a little rain must fall they are not very fond of dry weather. Unlike snails, they have no mobile "home" to go into. They have been lucky lately, as after a pretty dry April and May, June and July have been very wet here in Wales. I have been watching this slug for weeks or maybe it has been a different slug every day. It has this habit of climbing up the bird table every night and by morning it is slurping all over the dangling block of bird fat. The slime of the leopard slug is clear A Slug's Life book.
