Captain Smith was the captain of "The Titanic". He hoped to prove that "The Titanic" was the fastest ship in the world. Although it was early spring he led the ship to the north. He knew that there were icebergs, but "The Titanic" was considered to be unsinkable. When he understood his mistake he helped to evacuate passengers and died hero. He was one of 1490 people who drowned on that terrible night. Part of the problem, of course, is the relative scarcity of historical documents relating to pirates of the last part of the so-called Golden Age—roughly the years between 1716 and 1726—but some of the difficulty in critiquing pirate narratives lies in the historical authority and stamp of authenticity that have been bestowed upon the ones that do exist. Second, both the Gow chapter in General History and the separate pamphlet Conduct and Proceedings of the Late John Gow (Anonymous 1725a), sold by rival publisher John Applebee, provided Moore with evidence for Defoe's authorship of both works. The captain, realising that his orders were being disobeyed, consulted his mate. The two men agreed to stash some small arms in the cabin so they could defend themselves in case of mutiny. Unfortunately for the captain, two of the conspirators on the upper deck overheard the conversation. Not realising that Gow was the ring leader of the attempted mutiny, Freneau ordered Gow to prepare arms to defend the crew. Upon hearing this, the mutineers decided to act that night. At ten p.m., a pirate code, pirate articles or articles of agreement were a code of conduct for governing pirates. A group of sailors, on turning pirate, would draw up their own code or articles, which provided rules for discipline, division of stolen goods, and compensation for injured pirates. Buccaneers operated under a ship's articles that, among other things, governed conduct of the crew. These "articles of agreement" became authority independent of any nation, and were variously called the Chasse-Partie

The son of a tenant farmer, apprenticed to trade at fifteen, he ran away to serve under Lord Willoughby in the Netherlands and afterward in Hungary and Transylvania, against the Turks. He was captured, enslaved, escaped to Russia, returned to England in 1605, and the next year accompanied Newport's expedition to Virginia, apparently not without conflict with the authorities. Later he explored the Chesapeake, was for a time Colonial President, returned to England in 1609, and in 1614 explored the coast of New England from Penobscot to Cape Cod. A third expedition in 1616 resulted in his capture by the French. Powhatan's Treatment of Smith. Captain John Smith was the most able of the original Jamestown settlers. An energetic 27-year old soldier and explorer, he had already had a life full of action when he landed there in 1607. It was he who organized the first Jamestown colonists and forced them to work. If he had not done that, the infant settlement would probably have collapsed. According to a story chat he told later (which not everyone believed), the Amerindians were going to beat his brains out when Pocahontas, the twelve-year-old daughter of the chief, Powhatan, saved his life by shielding his body with her own. Pocahontas went on to play an important part in Virginia's survival, bringing food to the starving settlers.

John Gow (c. 1698â€"11 June 1725) was a notorious pirate whose short career was immortalised by Charles Johnson in the 1725 work *The History and Lives of All the Most Notorious Pirates and Their Crews*. Little is known of his life, except from an account by Daniel Defoe, which is often considered unreliable, the report on his execution, and an account by Mr. Alan Fea, descendant of his captor, published in 1912, almost two centuries after his death. With the *Proceedings of Those Several Colonies and the Accidents That Befell Them in All Their Journyes and Discoveries. Also the Maps and Descriptions of All Those Countryes, Their Commodities, People, Government, Customes, and Religion Yet Knowne*.Â Or, at least, that's what the boring accounts of other people say. Smith's version of these 1609 events is much more exciting.Â Between all of the self-serving stuff and the constant examples of just how amazing and heroic Smith was, *A Generall Historie* does have some good bits: explosions, adventures, lots of people shooting each other with guns and arrows or hitting each other over the head, and explanations about some puzzling bits from his last work, like all the stuff about how everyone.

John Smith was responsible for the settlement and survival of first English colony in the New World. Captain Smith was an English soldier, explorer, colonizer, publicist and an author. He led the group of colonists of the first British colony at Jamestown, Virginia from September 1608 to August 1609. He is known for his incredible adventures and expeditions. However, due to his own exaggerated storytelling, his real achievements have been masked by lure and legend. Captain John Smith was born in late 1579 or early 1580. The exact date is not clear. He was born in a farmer family in Willoughby, England. He did his studies in Alford and he stopped his studies after his father died. His father died in 1596, when he was just 16. With the ship now under command of the pirates, Gow was elected captains and they retrofitted the ship for piracy. Gow remained the ship the Revenge and began their career as pirates around the Iberian Peninsula containing Spain and Portugal along with France. John Gow Killing the Captain - Pirates Own Book (1837). However at this point the crew and ship were running low on supplies. Therefore Gow decided to head back to Orkney in order to restock. Calling himself an alias 'Mr. Smith', Gow pretended to be an honest merchant who was returning to his childhood home. He told everyone his ship had JOHN GOW was a native of one of the Orkney Islands, in the north of Scotland, and was instructed in maritime affairs, in which he became so expert that he was appointed second mate of a ship, in which he sailed on a voyage to Santa Cruz. When the vessel was ready to weigh anchor the merchants who had shipped goods on board her came to pay a parting visit to the captain, and to give him their final instructions. On this occasion the captain, agreeable to custom, entertained his company under an awning on the quarter-deck; and while they were regaling, some of the sailors preferred a complaint o
