Ruth Harrison's book *Animal Machines* (1964, reprinted 2013) was definitely the pioneering publication which attacked the industrialisation of animal production. Results of the Canadian review of scientific research on priority issues[3] In the introduction to the review, the authors declare that a welfare code should be based on the best available knowledge. Having analyzed both theories from a philosophical perspective it might be apt to have a brief look at both men's work in a historical context. For Hobbes was writing at a time of civil war, a time when fear of violent death was prevalent, the state of nature was a close reality. Through whichever lens we analyze both men's theories though, we can see the great differences in their conclusions to the same questions. Through their understanding of man, in terms of either desire or rationality, their understanding of rights and obligation and their laws of nature, we can see Locke's state of nature as being one of far greater security than that of Hobbes.
