Early Childhood Education provides children to learn with diversity. Children develop healthy social interaction by mixing with other kids from different cultures and backgrounds. Thus, early learning gives them positivity, self-esteem, and self-confidence. Also, sending the child to an early childhood education centre creates a scope for a mom to work outdoors. This increases family income and benefits the state's economy as a roundabout. EUREKA!! Child play in early childhood is dominant daily activity. Music game and the increasing attention paid to it has been a result of changing the concept of musical upbringing and education in broader professional circles. In the same time it is beyond dispute that learner-specific features are significant factors of foreign language learning and teaching. in the same time game and work because play affects all aspects of child development (senso- motor, cognitive, emotional, moral, social, as well as speech development). In social view, play is preparation of child for life in society with others. Also, we will include classification of preschool children games, in accordance with their level of cognitive development and level of social inclusion. Parent involvement in early childhood education can extend the experiences that a child has in the classroom to real-world activities that happen in the home. A parent who understands what their child is working on at preschool has a better sense of their child's competency and which areas they need to work on to improve confidence and ability. One of the most difficult challenges for early childhood educators is figuring out how to better engage parents in their child's learning. By establishing good lines of communication between your child care center and parents, as well as making a strong Early childhood education (ECE; also nursery education) is a branch of education theory that relates to the teaching of children (formally and informally) from birth up to the age of eight. Traditionally, this is up to the equivalent of third grade. ECE emerged as a field of study during the Enlightenment, particularly in European countries with high literacy rates. It continued to grow through the nineteenth century as universal primary education became a norm in the Western world. In recent years Play and ordinary life in early childhood. In studies of the play of young children most attention is paid to the educational benefits of "pure play" that is, activities in which the child is spontaneously engaged for fun and pleasure: babies' playful movements with legs and arms; babies' proto-conversations with parents and teachers; toddlers' physical play of running around and going down the slide; playful explorations in the sandpit. From the perspective of young children there are no clear boundaries between play, care, and work. During feeding or washing or diaper changing they can suddenly stop and demand the caregiver's attention by laughing or making play noises (Shin, 2010). Toddlers play while eating and drinking in the day-care center.

This work was inspiring in that it doesn't require anything awkward in cultivating your child's early life, but rather that you focus on creating harmony in the home/care center. As a mother of two toddlers, I was particularly impressed because Jaffke's book inspired me in many ways, but it even inspired me to want to iron (for the good of the children, of course). Early childhood is a stage in human development. It generally includes toddlerhood and some time afterwards. Play age is an unspecific designation approximately within the scope of early childhood. In psychology the term early childhood is usually defined as the time period from birth until the age of six years, therefore covering infancy, kindergarten and first grade. There are three simultaneous development stages

The Working in Early Childhood program is a set of learning materials that introduces the foundational knowledge and skills required to work with young children and their families in a range of early years settings. Aspects of child development, play and learning, health, safety, nutrition and communication are facilitated through the completion of workplace based tasks that include the preparation and implementation of regular play activities for young children. Freya Jaffke was born in 1937. She worked at Reutlingen kindergarten in Germany for many years and now lectures throughout the world in teacher training colleges. She is the author of fourteen books and has sold over a quarter of a million copies worldwide. The work reviews the ongoing controversy over work and play within the framework of a constructivist early childhood curriculum. Educators and parents with narrow perception of play view it as mere physical actions of walking, clapping and singing outside class work. However, educators who hold a constructivist epistemological view of child play see play as educative, and possessing ingredients for stimulation that foster an all-round development of children. The paper examines various dimensions of play and work within a constructivist early childhood education paradigm, with special reference to Early Childhood Education provides children to learn with diversity.
