Description:

Praised by instructors and students alike, PROGRAM EVALUATION: AN INTRODUCTION helps your students evaluate services and programs that they will encounter in their professional practice. In the process of learning evaluation techniques and skills, students will become proficient at critically analyzing evaluation studies conducted by others. The authors present and simplify all the essentials needed for a critical appreciation of evaluation issues and methodology. The authors' clear writing style and clear presentation of concepts, as well as the text's hands-on and applied focus, will guide students on how to gather evidence and demonstrate that their

interventions and programs are effective in improving clients' lives.

When beginning an evaluation, program people will often want the answer to this question: "Does the program work? And how can it be improved? However, there are many equally important questions. "Is the program worthwhile? "Are there alternatives that would be better? "Are there unintended consequences? "Are the program goals appropriate and useful? This handout focuses on the first of these issues: how program evaluation can contribute to improving program services. Evaluations, and those who request them, may often benefit, though, from a consideration of these other... An Introduction to Mixed Method Research. By Jennifer Byrne and Aine Humble. Students learn how to gather evidence and demonstrate that interventions and programs are effective in improving client Introduction. Program evaluation is an essential responsibility for anyone overseeing a medical education program. A "program" may be as small as an individual class session, a course, or a clerkship rotation in medical school or it may be as large as the whole of an educational program. The "program" might be situated in a medical school, during postgraduate training, or throughout continuing professional development. All such programs deserve a strong evaluation plan. Similar gains will apply when an education manager engages an external evaluator or is helping to evaluate someone else's program.
