Keeping your books clean can significantly extend their lifespan. The fastest way to keep dust from reaching the pages of your favorite books is by storing them with their spines facing out. What Youâ€™ll Need. Clean the cover of your book. Wipe a paper or matte-finished cover with a soft cloth or a dry cleaning pad (available at art supply stores). If your book is leather-bound, rub petroleum jelly over the cover with the soft cloth and then buff it to achieve a like-new shine. Why Clean Air Indoors is So Important. Breathing quality indoor air is very important especially if you want to have good health. Most people spend a significant amount of their time indoors either in the office or at home where chemical gases and other pollutants can cause headaches, allergies, eye irritation, and fatigue. Other dangerous pollutants can even lead to some types of cancers and other serious health complications. If you are breathing clean air, you can easily prevent many health hazards. Common Indoor Pollutants. CleanAIR® is specialized in design, development, and manufacturing of powered air respiratory devices for personal protection in various industrial environments.
